Warning

This appliance is not intended for use by persons(including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge. Unless they have been given supervision or instruction concerning used of the appliance by a person responsible for their safety. Children should be supervised to ensure that they don't play with the appliance. The company is not responsible for any consequences if any of the above action are in violation.

If there is a failure, please contact the guide on guarantee card, such as the maintenance station can not solve the problem can be directly contacted to our company.

Production Features

• Natural Cool

Cycles the water to blow cool air. It can reduce the surrounding temperature and provide a comfortable environment in hot summer.

●Air Clean, More fresher

Unique wate honeycomb washing function removes the gases effectively like Formaldehyde, Ammonia which comes from the paint, adhesives and plywood of the new decorated houses. It also can filter the cigarette nicotine and freshen the air to care for your health.

Ionizer

It releases negative ions to activate variety of enzymes to promote the human's metabolism and improve sleep quality. It also can be used for sterilization to freshen the air and care your health.

• Separating water tank, detachable filtration mesh

Separating water tank design, water-tight and easy to be cleaned by water. Pour out the water can prevent bacterial growth. Filter can be removed and clean by mild detergent and softy brash directly.

• 80 W Energy saving, Physical refrigeration, High-efficiency, Environment protection

It used of advanced physical refrigeration technology, have larger water storage capacity, long running time, can be used for a long lime again and again. The entire input power is 80W, the power consumption is only 1/20 of the air conditioner. This product is environmentally home appliances, no fluoride pollution, are open doors and windows type cooling appliances, can be used as a partner of air conditioning products so the effect will better.

\bullet LED digital display & soft touch panel, 90° wide range of air output

It's LED digital display and soft touch panel, up and down adjust by hand freely; left and right 90* wide range of air output. 3 fan speeds: HIGH-MID-LOW, separate sleep mode, quiet and silent

• Long distance remote

6.5 meters remote control, 120° wide range receiver.

• Touch button, Beep prompt function

Touch button, Easy to operate. Beep prompt function sound good.

• Memory function

It can memorize the current working status and the memory is not cleaned until the power supply is off

• Temperature detection and display

It can show the temperature at any time.

• 24 hours Timer

1-24 hours timer setting, setting hours will be closed automatically if no anymore operation.

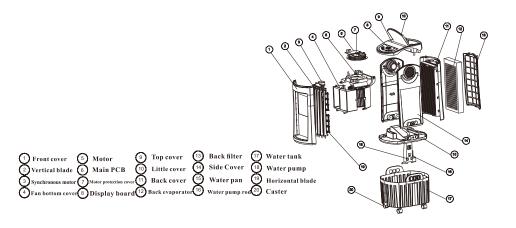

• Water shortage Detection

When work with cool function, if water is not enough, "Bi-Bi" alarm sounds, the corresponding light flickers and then the water pump will stop working after 3 seconds if no water added in.

• Bluetooth function (Optional function)

There is bluetooth speakers inside, connect the phone to play the music for your entertainment.

 $Remark: Due \ to \ constant \ development \ of \ our \ production \ in \ regards \ to \ specification \ and \ design, \ we \ take \ reservation for \ changes \ without \ prior \ notice.$

OPERATION INSTRUCTION

- 1. Pull the unit outwards from the carton and place it on the floor.
- 2. Check if the spare parts are complete, same as the spare parts list.
- 3. Place the unit on the floor, take out the wheels to assemble.
 Note: Two casters with brake are for the two front holes and casters without brake are for the two back holes at the bottom of the unit.
- 4. Follow up the direction, then add water. (Show as fig 1)

Note

- Pay attention to the water level indicator to avoid overfilling.
- Water level must be between the MIN and MAX line.

(fig1)

- With purifying air function, after some time operation, water in water tank may have smell. It is recommended
 to change water and clean water tank frequently.
- Water shortage alarm, when the water level is lower than "MIN" level, then the "Bi-Bi" alarm sound can be heard and the corresponding indicator light flickers, and after adding water to the normal water level, the light is off. then restart the cool function.
- 5.Only use the unit with correct power required .Get the plug pin into power and a small "beep" sound can be heard and the unit is in standby state.

Note

- To protect against electric shock, do not remove plug by wet hand.
- Unplug from outlet while moving the unit.
- Insert the plug pin into the wall socket and make sure it is connected well

CONTROL PANEL AND OPERATION

- 1. ON /OFF: In the standby, press this key, then the digital display screen show temperature, and the wind wheel motor at low speed wind start. If the shutdown in the cool function, the machine will delay 15 minutes to dry filter, after automatic shutdown. Press again the button to turn off.
- 2. SPEED: Press this button to select desired fan speed, LOW- MID- HIGH- LOW. in turn. the corresponding speed indicator light will be displayed. the motor delays 5 seconds for the first start

- 3. **SLEEP MODE:** Sleep mode button is a valid key when power is, press this button, the corresponding indicator light is on and press this button again, then revert to work under the memorized speed.
- 4、 **SWING:** press this button to control the switch of the motor of Vertical wind blade(first on, second off) the corresponding indicator light is on, mean that load output.; Up and Down swing manually.
- 5, **COOL:** press this button to control the switch of cool function (first on, second off)
- 6. **IONIZER:** the function start automatically when it is on. press this button to release negative ions into the air(first off, second on)the corresponding indicator light is on.
- 7. **Temperature test:** It will work after power on, the temperature probe automatically detects the environment temperature and displays it on the digital display screen.
- 8. **Humidity test(Optional function):** It will work after power on, long press the ionize button for 3 seconds, and the environment humidity will be displayed on the digital display screen. After 3 seconds, the remaining time of 24 hours timer or temperature detection will be displayed in a cycle, and then press 3 seconds to cancel the humidity detection function.
- 9. **TIMER**: It can be set from 1 to 24 hours, with hourly incremental intervals. When the digital display 24 hours, press this button again to cancel and display "0", after flicking 5 seconds automatically display the temperature.
- 10. Bluetooth: Press this button in any state, the device will send out the voice prompt "The bluetooth device is ready to pair", turn on the Bluetooth function of the mobile phone to search a device name "RBW Audio" and then click connect. Then will listen "connected successfully" prompts, so you can listen great music after opening the audio player on your phone. When you disconnect □ the device also will send out the voice prompt "The bluetooth device is ready to pair". (This function can be used alone in standby mode □ only connect one device at the same time)

Notice: the function of remote control is same with control panel.

IMPORTANT SAFEGUAREDS

- 1. Do NOT open and repair the unit by any unqualified person.
- 2. Wet hands are not allowed to operate the machine, and cleaning and wiping of the connected-power machine is not allowed, to avoid damage caused by electric shock. If you do not use the unit for a long time, please unplug the power plug, drain the water tank, and put it in a dry and cool place.
- 3. Do not insert any other objects into the grid of air vent (inlet or outlet) during operation. The machine is equipped with a high-speed rotating fan to prevent accidental injury or damage to the machine.
- 4. Do not cover the appliance with paper, cardboard, plastic, metal foil, or any other flammable material. Otherwise, a fire may occur. Keep the appliance away from any hot sources.
- 5. Do not use outdoors, indoors only. Avoid direct sunlight for a long time
- 6. Water level must be between the MIN and MAX line.
- 7. After filling with water, do not lean the unit and avoid moving it, which may cause water to overflow the sides of the tank and leak. If the unit needs to be moved a little, push on the side gently.

- 8. Never put the unit side down especially with water inside, if it accidentally falls down, unplug the power immediately and don't restart until it's dry at least for 24 hours.
- 9. Do not place any objects on the top of the unit. Don't cover the unit window while using.
- 10、Keep the air vent (inlet or outlet) away from obstacles such as curtains, walls and so on.
- 11. Since this product can clean the air, the water in the water tank is easy to deteriorate and produce peculiar smell, please pay attention to change the water; Use this machine to humidify in winter, if the indoor temperature is below zero, it is better to use warm water to humidify.
- 12. Do not insert any other objects into the grid of air vent (inlet or outlet) during operation.
- 13. Don't use the unit in the damp environment like bathroom, swimming pool.
- 14. This appliance can be used by children aged from 8 years and above and persons without reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance.
- 15. Cleaning and user maintenance shall not be made by children unless they are older than 8 and supervised.
- 16. Keep the appliance and its cord out of reach of children less than 8 years
- 17. If the supply cord is damaged, it must be replaced by its service agent or a similarly qualified person in order to avoid a hazard.
- 18. This appliance is intended to be used in household and similar applications such as:
 - --staff kitchen areas in shops, offices and other working environments;
 - --farm houses:
- --by clients in hotels, motels and other residential type environments;
- --bed and breakfast type environments.
- 19. Insert the power cord end into air cooler socket, make sure connect well. Must unplug the power cord pin from wall socket before moving the air cooler or adding water. Do not unplug the power cord end directly when the air cooler is working or moving the unit.
- 20. When use 12V:; Will auto into sleep mode once lower than 10.8V; Will auto stop working and display error code once "E3" lower than 9.8V
 - When use 24V: Will auto into sleep mode once lower than 21.6V; Will auto stop working and display error code once "E3" lower than 19.6V

MAINTENANCE AND CLEANING

Note: After long time operation, the filtration mesh becomes clogged with dust and dirt, which will greatly affect the unit's performance. It is recommended to clean the filtration mesh every two week.

Cleaning the filtration mesh

- 1.Pull the plug
- 2.Loose screw, catch the filtration mesh handle and pull upwards.
- 3.Clean filtration mesh with mild detergent and soft brush.
- 4. Make sure filtration mesh is completely dry before installing.

Cleaning the water tank

- 1.Remove the plug power.
- $2. Open \ the \ hooks \ on \ both \ \ sides \ of \ the \ tank, pull \ out \ of \ the \ water \ tank.$
- 3.Add water into the water tank and clean.
- 4. pour out the water and make the water tank keep dry

In order to keep greatly effect of cooling, it is recommend to clean the water tank every three months.

Cleaning the body

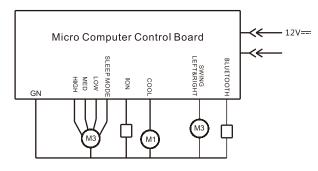

Clean the body with a little mild detergent on a soft cloth.

Note:

Unplug from outlet before cleaning.

No water on the control panel and the top of the product.

CIRCUIT DIAGRAM

TROUBLE SHOOTING

Please make the following checks before you request repair

Problems	Possible reasons	Solutions	
Not working	The plug is not securely inserted into the socket or not connected well. The "ON/OFF" button is not pressed.	Insert the plug pin into the wall socket and make sure it is connected well Press "ON/OFF" button after plugged.	
Cool effect not good	1.Not enough water in water tank 2.Water pump is blocked 3. Air vent is blocked by dust	1.Add water to ensure enough water for pumping 2. Clean water tank and remove the impurities. 3. Clean the dust or foreign objects from the air vent	
1.E1:Problem in temperature sensor circuit 2.E3: The power supply voltage is too low		1.Please replace the probe 2.Please replace the power supply	

Please send for repair under the following circumstances:

- 1. The problem cannot be found in the list or it continues.
- 2. Foreign substances or water enter into air cooler, causing the air cooler cannot be run.

This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.
